

ABSOLUTELY CLEAN

Fragrance proposals for steam cleaners

CLEANLINESS THAT GOES DEEPER

Steam cleaners ensure pore-deep and hygienic cleanliness in every household and stand for gentle cleaning of surfaces and floors. In contrast to high-pressure cleaners, they work at slightly lower temperatures and a lower water pressure. The hot steam, usually around 150 degrees Celsius, removes tough and above all greasy dirt from floors, home textiles and furniture. Even bacteria and germs can be removed by using the hot steam.

APPLICATION POSSIBILITIES

- Windows
- Tiles
- Laminate
- Carpet
- Mattresses
- Upholstered furniture
- Carpet rolls

ADVANTAGES OF STEAM CLEANERS

- with only one unit depth cleaning for many surfaces, such as floors, windows, kitchen worktops and furniture
- steam removes grease, lime and dirt
- hygienic cleanliness without chemicals and without great effort - no additional cleaning agents required
- steam also binds dust instead of whirling it up - cleaning with steam is therefore also recommended for house dust allergy sufferers

STEAM CLEANING MADE PERFECT

Finally a heavenly fresh scent makes the cleaning experience with a steam cleaner perfect.

Bell Flavors & Fragrances therefore provides perfectly matched fragrances for steam cleaning systems.
